

The weather was dampened but the spirit certainly wasn't!

The second ever Ford Power Live was held at Snetterton this weekend. Despite the rather rainy weather, plenty of people braved it, bringing a fabulous turnout to the festival.

Ford Racing UK were there giving people an insight into the racing world, and how they can get involved. They organise championships including the Puma Cup, Saloon Series and the Fiesta Championship, which have become majorly successful! Some of their cars took to the track to treat the crowds to a demo of some Ford Racing action.

With the 200 Circuit being used for a public Ford-only track day, the smaller, 100 Circuit was used for lots of demos. With the track being so wet from the rain, a few people had a wobble, luckily there were no crashes! MSVTRacing showed off their new EnduroKA's on the 100 Circuit, ready for the brand-new series to start next year. There was also some mighty Mustang power roaring around the track, enticing the crowd with their 5.0 litre of muscle.

As well as the demos there was also plenty of show areas to feast your eyes on some marvellous Fords. There was a HUGE array of cars, from modern American Muscle to 1940s Anglia's. It was amazing to see the immaculate conditions owners keep them in, showing off the time and effort they invest into their cars.

It was brilliant to see so many people, young and old, all sharing the same passion for the wonderful world of Ford Power.
